Subject: Pavillion vs. Dimock

I left a message with the R8 CIC so hopefully I'll hear back today. As we were running for the stairs, I missed what you were exactly asking for but I believe you mentioned drilling new wells? Below is a link to a R8 presentation that mentions monitoring wells installed by EPA. I also attached their website link---clearly R8 had a different approach to releasing their data results---public meetings, fact sheets, independent review, public comment, etc.
